

UNITED SYSTEMS EUROPE

A MAA Community Action

Cooperation, Coordination,
Education & Harmonization
To Create & Grow A Safe,
Sustainable & Societally
Acceptable Market

FOCUS

- Manually operated, automated, and autonomous vehicle (MAA) systems in the aerial, terrestrial, nautical & space domains
- Current & future operators & operations

SCOPE THE FUTURE

Together with
national, European &
international colleagues

EUROPEAN MAA SYSTEMS MUSEUM

For **historical, educational and public awareness creation** reasons, USE aims to initiate, promote and coordinate the establishment of an European museum **network** exhibiting MAA systems (civil & military).

The network would have a **central & publicly accessible** online knowledge centre, where related documents; photos and videos (donated by entities in all participating countries) are available.

USE aims to promote the establishment of a museum for MAA systems in every country in the European Union.

These national museums will house their national military, civilian and nationally produced MAA systems, obtained as donations.

The national MAA museums could be federated or otherwise interconnected.

The national museums could enter their national documents and videos into the knowledge centre's central database, which would be managed by an umbrella organisation.

Defined sections of the central database would be publically accessible, other sections would only be accessible to qualified and registered entities (e.g. schools, universities and research organisations).

Temporary exhibitions organised by a museum, member of the museum network, could be exchanged within the museum network.
