

UNITED SYSTEMS EUROPE

A MAA Community Action

Cooperation, Coordination,  
Education & Harmonization  
To Create & Grow A Safe,  
Sustainable & Societally  
Acceptable Market

### FOCUS

- Manually operated, automated, and autonomous vehicle (MAA) systems in the aerial, terrestrial, nautical & space domains
- Current & future operators & operations

### SCOPE THE FUTURE

Together with  
national, European &  
international colleagues

<https://united-systems-europe.eu/>

## CONTEXT

- ◆ MAA systems embody the technological progress made in several key areas (i.a. IT, electronics, telecommunications, artificial intelligence) & supply substantial societal benefits for an evergrowing market.
- ◆ The design, production & use of these systems create a wide variety of jobs within a very large ecosystem.
- ◆ The dispersion of organisations, initiatives addressing this new industry, and the multiple information sources, are an obstacle to development.
- ◆ Several European countries have created platforms for exchanges between public authorities & industry, but the harmonized implementation of the new EU regulation shows a strong need for concerted consultation between the market stake-holders at European level.
- ◆ Several regulatory changes are necessary to frame the operations expected in the short- to medium-term (e.g. autonomous drones, BVLOS flights, flights in populated areas), which requires a consolidation of exchanges between MAA operators and EU regulatory authorities.
- ◆ This consultation must be accompanied by actions to support the development of the MAA market sectors, both financially and societally, as the acceptance of these systems will come at the cost of a wide educational & awareness creation effort.

## What USE Brings

In view of the aforementioned, as well as the strong international competition, USE proposes to:

- ◆ Unite the energies contributing to the development the European market for MAA systems in the aerial, terrestrial, nautical & space domains.
- ◆ Facilitate the de-compartmentalization between public & private actors in the emerging MAA system market through the establishment of collaborative work, proposals based on written contributions, a platform for consolidated information dissemination & digital exchanges, and events covering all relevant issues.
